

Tips for Arranging Equipment Finance

- 1) Obtain a finance quote first to ensure the equipment you are buying is affordable and fits in with your cash flow
- 2) Vector can arrange one deal that covers invoices from several different suppliers and this is ideal for larger projects
- 3) Choose a reputable equipment supplier who can reliably service and maintain the equipment after delivery!
- 4) Don't forget, furniture, cabinetry and building works are much easier to finance when combined with equipment costs
- 5) Check with your accountant which type of finance best suits your tax position - at Vector we can help with this too
- 6) Arrange the finance first, before you order an equipment. Most suppliers will know Vector and this helps the process.
- 7) Suppliers may ask for a deposit with the order - and we can cover this for you or even arrange finance 'deposit free'
- 8) Equipment finance in most new-start practices should be 'leased' as it considerably improves tax benefits later
